

FirstMail

A new service offered from First American Nationwide Documents (FAND)

▶ **Automated**

FirstMail is a new automated mailing service from FAND that facilitates the preparation of the federally required initial disclosure packages, as well as the timely physical mailing and tracking of the assembled packages.

▶ **Compliance and Time**

This new service handles the cumbersome process of preparing, mailing and tracking the initial disclosure package, keeping you in compliance and giving your processors more time to concentrate on other aspects of the mortgage process.

▶ **Customizable Reports**

FAND will produce reports that can be customized to support your audit requirements, detailing when each account's disclosure package was mailed. We use a bar coding system to track your package all the way through our system from receipt of package data to postmarking of the package.

▶ **Customized Customer Contact**

Initial Disclosure packages can be customized to satisfy any additional requirements that you might have. This process also can be used to include custom cover letters and additional marketing materials, flyers, survey requests, etc., to better serve and take advantage of this contact with your customer.

▶ **Pricing**

Pricing for FirstMail depends on the number of initial disclosure packages delivered for any given month and additional materials included. Please contact your First American sales representative for specific details.
